Educational Gain

Excellent for outcome based education.

No need for soldering equipment.

Electronic components already soldered on printed circuit board.

Implements state-of-the-art technology.

Includes surface mount devices.

Includes descriptive booklet.

Introduction to electronics.

Introduction to applied mathematical calculations for electronic components.

Improve lateral thinking and problem solving.

Sound foundation for further studies in engineering.

Further develop independence, confidence, responsibility, resourcefulness.

Excellent as a teaching aid for teachers.
